EDUCATION

Mekelle University

B.S. Software Engineering

▪ **CGPA: 3.5/4.0**

Expected: June 2026

Mekelle, Tigray

WORK EXPERIENCE

Ittihad Foreign Employment Agency

Fullstack Software Engineer

Mar. 2024 – Nov. 2024

Remote

- Ittihad Foreign Employment Agency is an international agency connecting domestic workers with established and reputable employers mainly in Saudi Arabia, Qatar, Jordan, Kuwait, United Arab Emirates and Lebanon.
- I was responsible for designing, developing and deploying a modern full stack application to manage the agency's day to day operations such as - securely storing and accessing employer and employee data, monitoring agents' performance and actions, communicating with foreign employers and partners.
 - Stack: Next.js, TypeScript, Prisma ORM, PostgreSQL

Avetol ([Rungooo.com](#))

Fullstack Software Engineer

Oct. 2023 – Jan. 2024

Hybrid

- At Avetol, I worked on Rungooo - a pioneering beverage delivery app, offering a unique and sustainable service that delivers a wide range of premium spirits, primarily featuring products from Diageo, directly to customers' doorsteps.
- As a Fullstack Engineer I was responsible for the development & deployment of the REST API and Admin Panel and web application, and collaborated with other developers in building the cross-platform mobile application.
- Worked on integrating local payment gateways (Chapa, ArifPay)
 - **Stack:** JavaScript (React); PHP (Laravel); Flutter; MySQL

PROJECTS

[Modern Online Learning Platform](#)

- A full-featured Learning Management System built with Next.js 14, featuring course management, secure payments, and SMS verification.

[Instant Package Delivery Platform](#)

- A modern instant package delivery system that enables swift deliveries and real-time tracking. Built with React (Vite), TypeScript, and shadcn on the frontend, and Node.js (Express) with Prisma ORM on the backend. Used Google Maps for real-time GPS navigation and tracking and Better-Auth for authentication.
